

Your gateway to the Metaverse

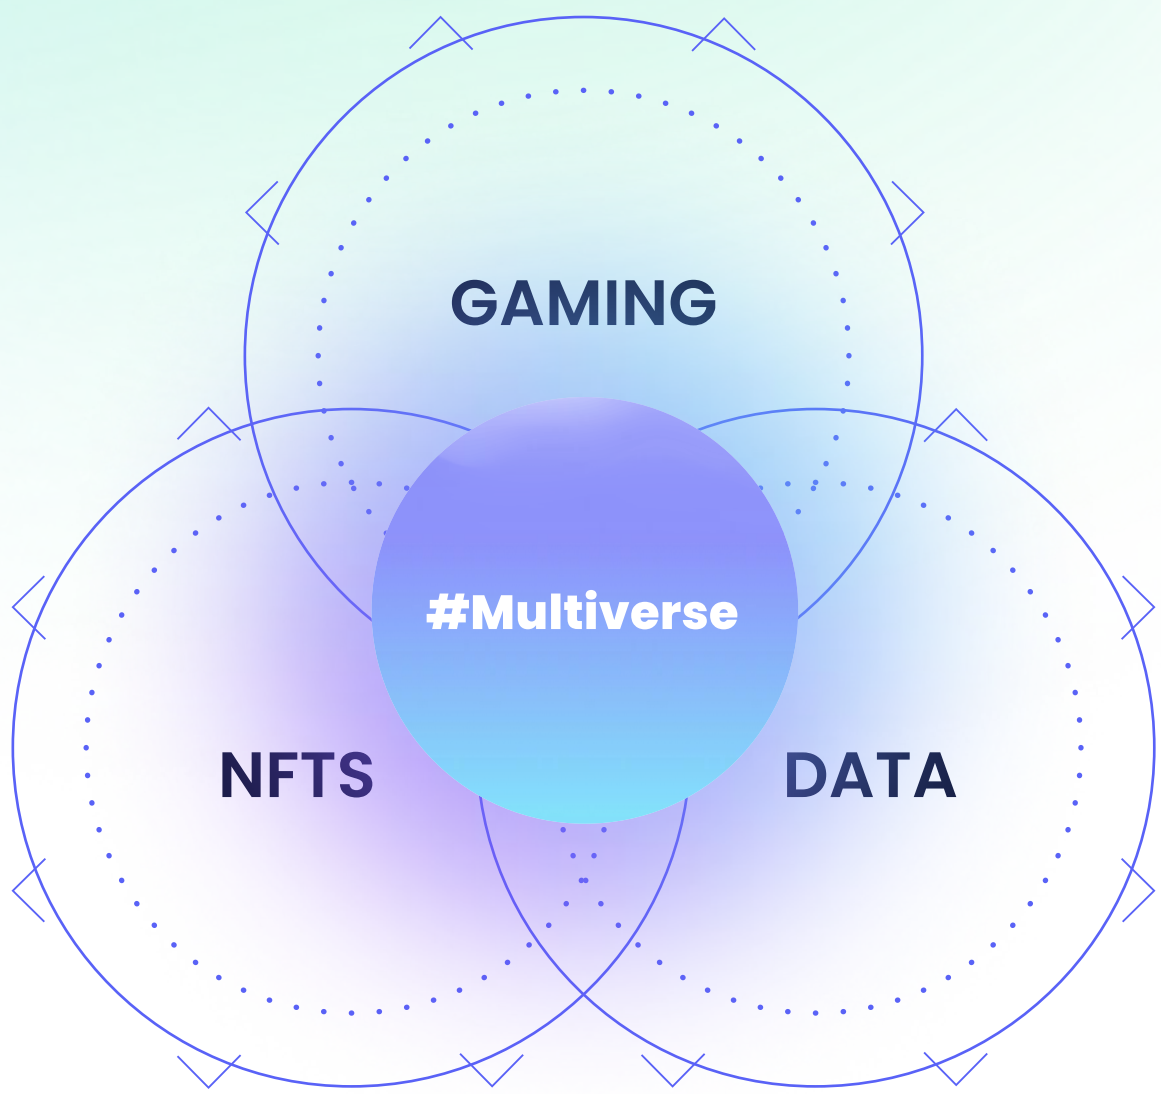

Ludo is the default Web 3 Play to Earn AppStore and search engine, offering you access to the best experiences and NFTs related opportunities.

ABOUT THE PROJECT

LUDO OFFERS AN EASY WAY TO DISCOVER EXPERIENCES AND EXPLORE OPPORTUNITIES IN THE METAVERSE.

We do so by aggregating NFT data from various on and off-chain sources, segmenting it on collections and using these collections as the basis for social experiences.

With our powerful set of tools, Ludo enables Creators, Collectors and Connectors to create, distribute and consume experiences and value, empowering users to leverage their time, skills, knowledge, wealth or reputation so that they can explore and fulfill their true potential in the Metaverse

PROBLEM

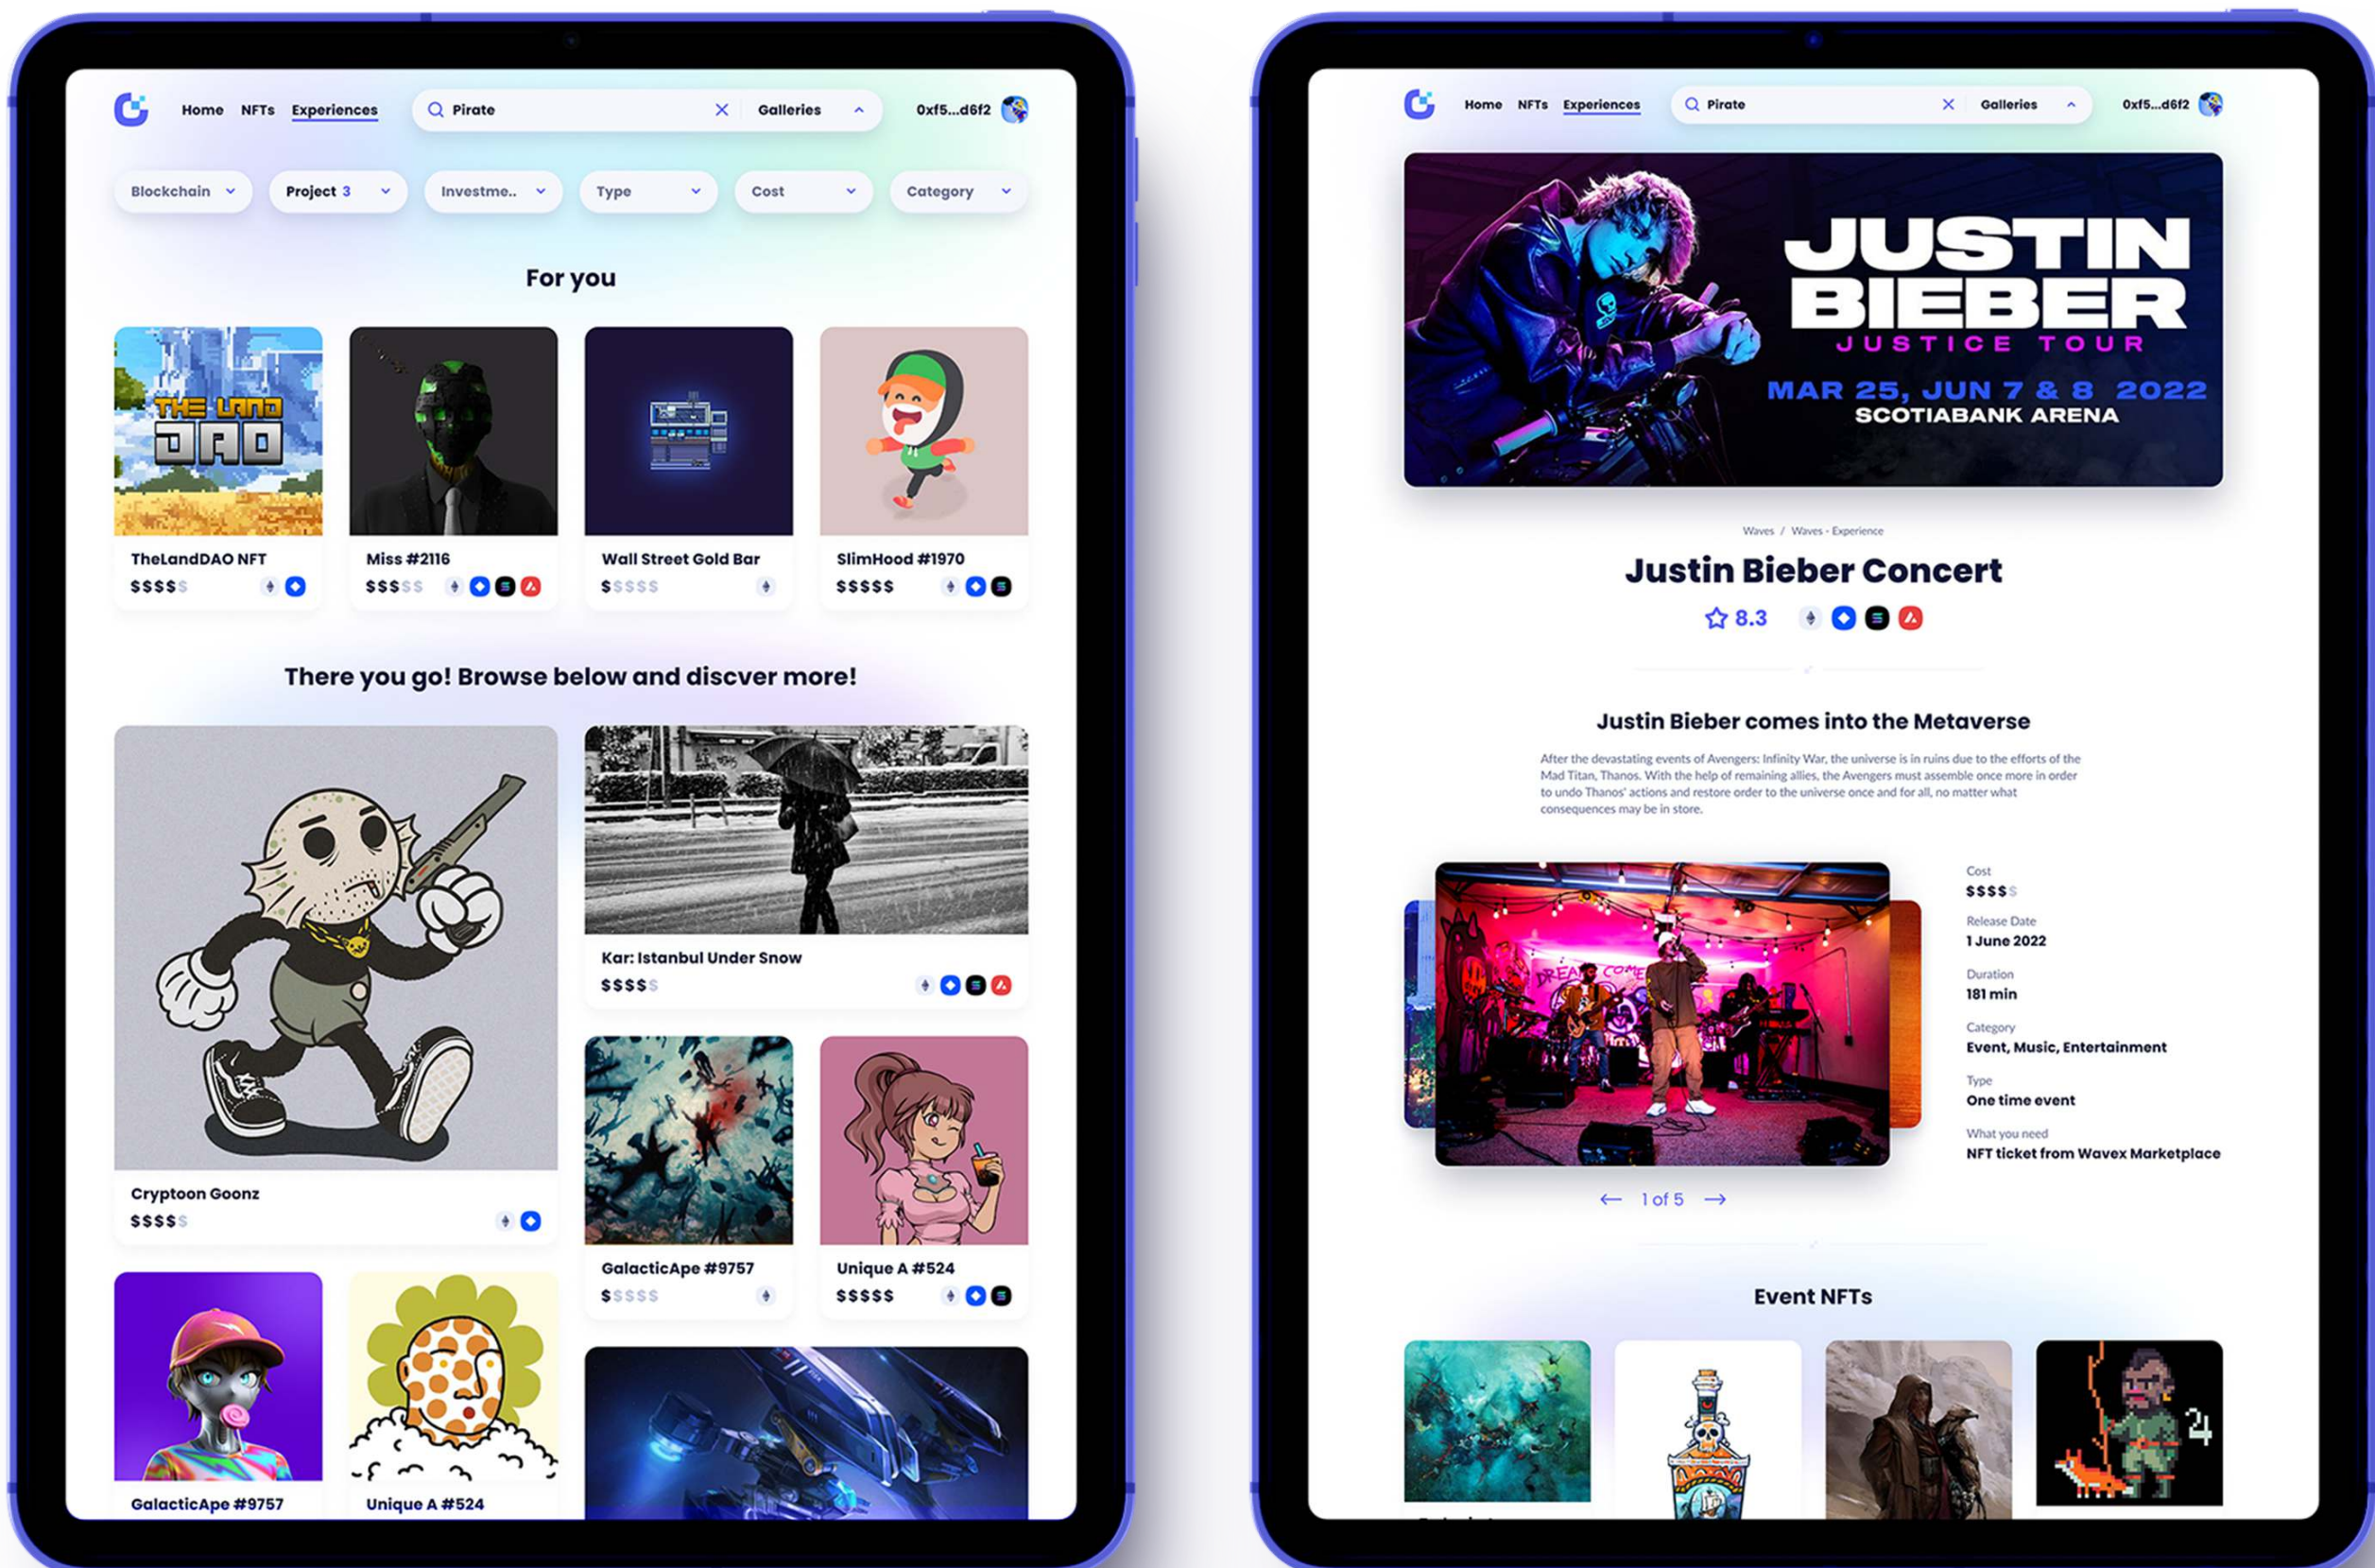

Web 3.0 experiences are wildly fragmented. There's currently no universal discovery mechanism for Web 3.0 and Metaverse experiences and opportunities, whether they are NFT collections, play-to-earn games, NFT gated events, chat rooms or workplaces.

This status quo is negatively affecting the user experience of Collectors, Creators, and players alike, severely limiting the mass adoption of NFTs and the appeal of Metaverse.

SOLUTION

Ludo is offering universal discoverability and aggregation of Metaverse experiences and opportunities (NFTs) and the simplest instances for purchasing and settlement of digital goods, we are making the world of digital assets accessible to everyone.

Users can enjoy a tailored experience based on a proprietary AI based profiling algorithm or by connecting their wallet. They will instantly be able to see all the available experiences that match their profile.

BUSINESS MODEL

Ludo monetizes the consolidation of a fragmented ecosystem.

By creating value for Creators, Collectors and Connectors, Ludo earns revenues through the following flagship products:

LAUNCHPAD

With Ludo Launchpad, we enable our Creators to Create and Promote their collections with a viral approach and design unique quests for Ludo users. For this service, we collect a fee.

LUDO ADS ENGINE

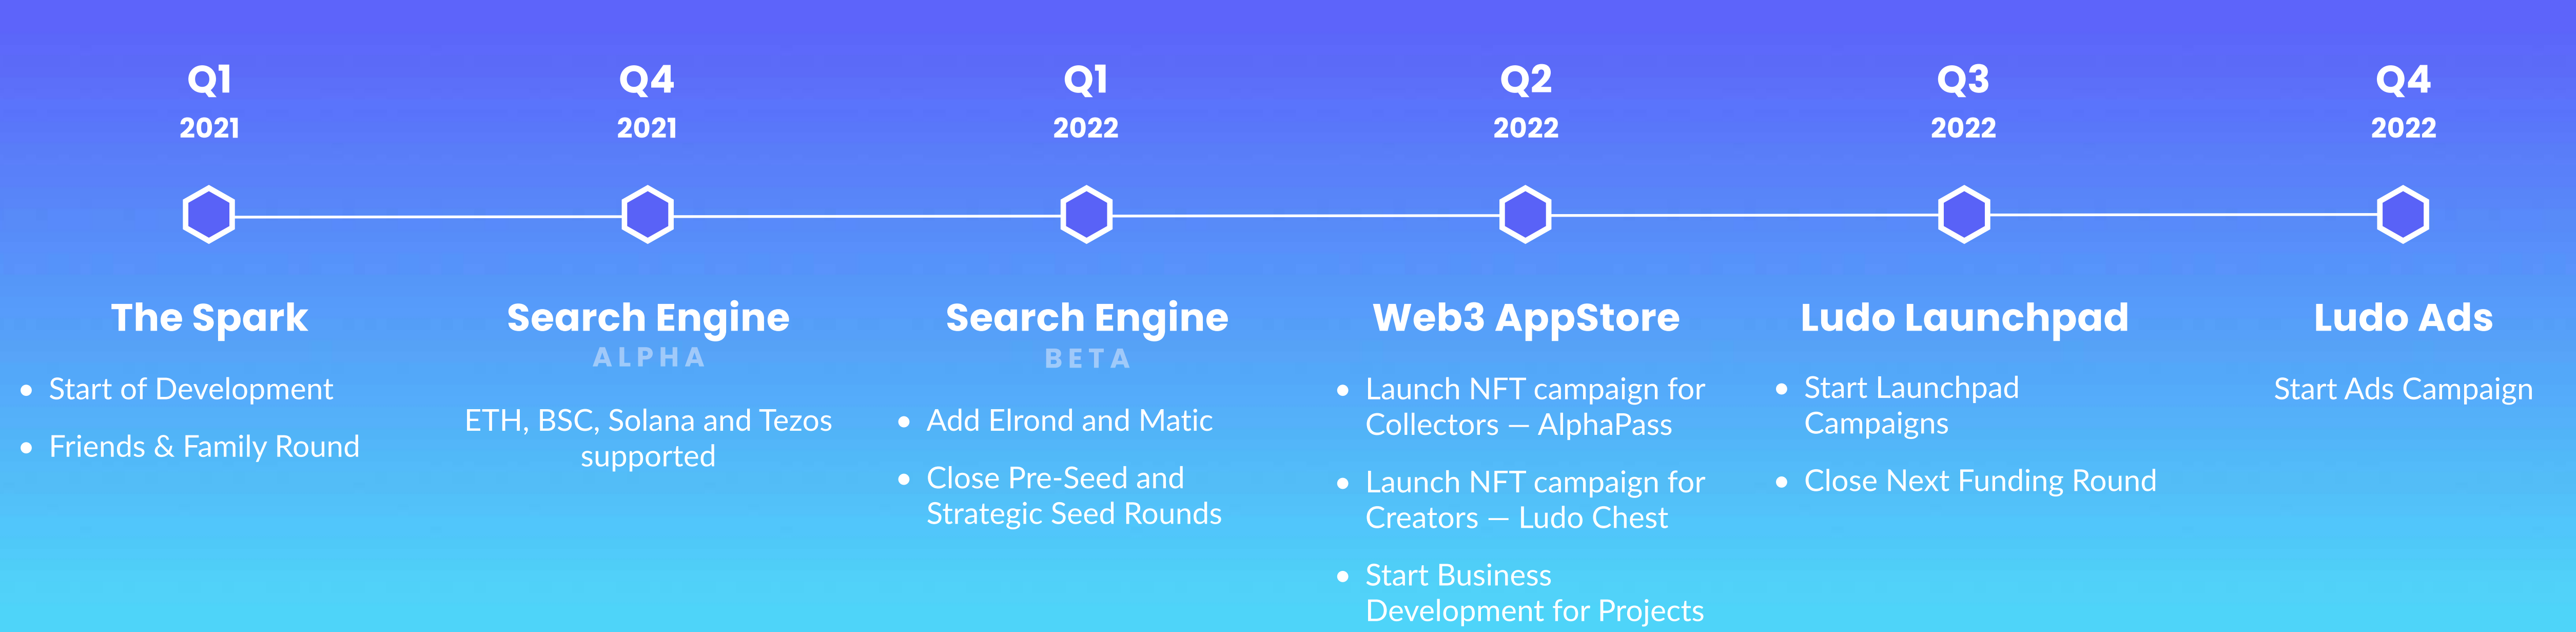

Creators will be able to promote their collections and experiences on our Web3 AppStore, where the apps are either metaverses, experiences, NFT's or other crypto assets.

MARKET AGGREGATION

By simplifying the experience for users, Ludo charges the following additional fees:

- Referral fees from referring transactions to the other blockchains/marketplaces
- Fees to access Compass, Navigator and Radar NFT tools
- Fees to access GameFi Dashboard & Tools

ROADMAP

USE CASES

Our use cases offer value to CREATORS, COLLECTORS and CONNECTORS

NFT Showcase

CREATORS COLLECTORS
